

## **Anonymous Candidate**

Machine Learning Engineer

### **Professional Summary**

Machine learning engineer with experience in building, training, and evaluating ML models. Interested in applied AI, data-driven systems, and continuous learning.

### **Skills**

- Python, SQL
- Machine Learning fundamentals
- Deep Learning basics
- Data preprocessing and analysis
- Git and basic cloud tools

### **Experience**

#### **Machine Learning Engineer**

Tech Company | 2023 – 2024

- Built and trained machine learning models for classification tasks.
- Performed data cleaning and feature engineering.
- Collaborated with team members on model evaluation.

### **Projects**

#### **Resume Analyzer**

- Developed a simple AI-based resume analysis tool using LLMs.
- Implemented PDF parsing and structured output generation.

### **Education**

Bachelor's Degree in Computer Science

University Name | 2019 – 2023

### **Additional Information**

- Strong interest in AI and emerging technologies
- Self-motivated learner
